APPROACH

Smart thinking.

In control of everything with your self-drive roadshow.

Get behind the wheel of the largest mobile promotion unit for a category B driving license.

InfoWheels® promises you the difference with our smart approach that puts you in control of everything.

Experience reliable and innovative roadshow solutions that create touching brand experiences to suit your needs. Check our self-drive quality standards and put yourself in the driving seat!

Drive yourself

No need to hire a professional driver. You, your staff, or anyone with a regular driving license (category B) can get behind the wheel of this multifunctional mobile unit.

Low cost

InfoWheels® are the largest of our promotional vehicles that can be driven with a category B driving license. Due to their relatively small size and easy set-up, you decide where and when to set up this easy, low cost, multifunctional unit.

Easy setup

Save set up time. It takes just five minutes to set up the InfoWheels® unit, giving you and your team more time to interact with your audience.

Self-sufficient environmentally friendly

Make your roadshows environmentally friendly with our Euro 6 engines and regulate the acceptable limit for exhaust emissions for new vehicles in Europe. InfoWheels® are fully self-sufficient units. The optional combination of solar panels and an extra-large battery pack will provide you with sufficient, reliable and eco-friendly energy.

Multi functional

Use the InfoWheels® for your specific mobile marketing, retail, communication or advertising needs. The InfoWheels® modular interior provides convenient options for a variety of purposes.

INSERTIE MIRENA® EXPERIENCE
