

# MOBILE STUDIO

REMOTE BROADCAST SOLUTION

# Remote your broadcast.

**Broadcast from any location with the Mobile Studio®**

The **Mobile Studio®** is a unique solution for remote studio production to the international broadcast market. For years broadcasters have been relying on separate solutions for commentary positions, on-site studio space and technical facilities to put their talent well and truly “on location”.

With the **Mobile Studio®**, the commentary position, the studio space and the technical facilities are combined in a single mobile unit. The **Mobile Studio®** is a broadcast solution for the coverage of major sport events, festivals, football and sport matches.

# Your live event TV studio.

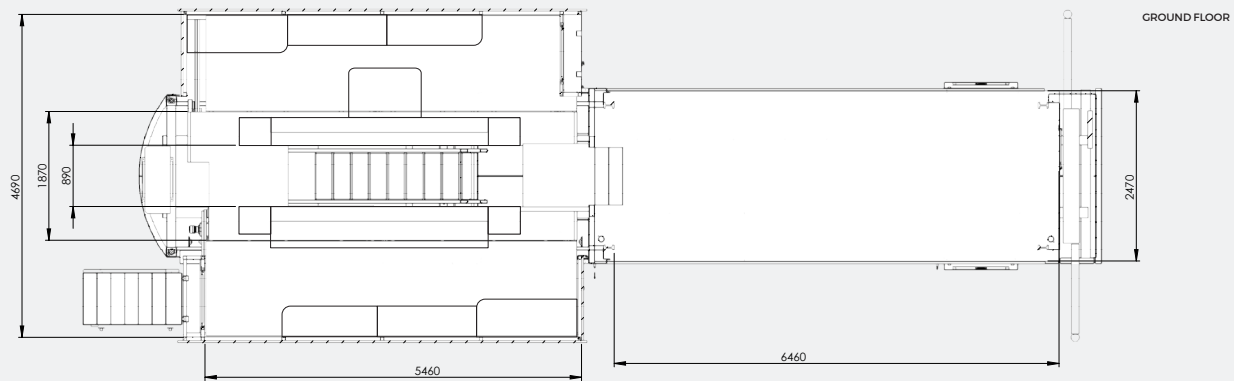

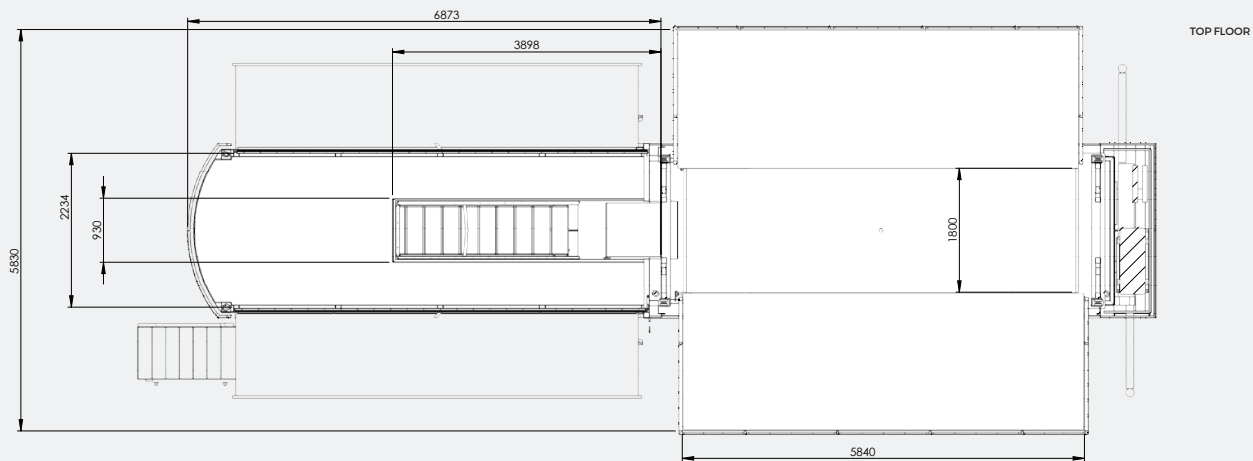

Support your coverage of major events with a single mobile unit.

The **Mobile Studio**® is designed around an internal hydraulic platform that rises 3.5 meters above the ground with a camera deck. The top floor expands to a 35 m<sup>2</sup> air-conditioned studio with RoscoVIEW polarized windows.

The **Mobile Studio**® also features an office with up to 6 workstations, a coordination room, a make-up room and technical facilities necessary to support live or taped production.

The facility is designed to function autonomously and requires only a separate transmission solution to deliver ready-to-air studio content anywhere in the world.

REMOTE BROADCAST SOLUTION

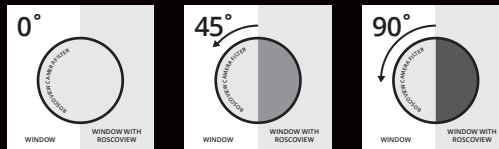

# Variable intensity and exposure on windows.

Your exterior exposure easily controlled with RoscoVIEW.

RoscoVIEW is a unique two-part window control system for film and television professionals.

It consists of wide width polarizing filter installed on windows and a matching camera polarizing filter.

With RoscoVIEW panels on the windows of the **Mobile Studio**®, the exterior exposure can be easily controlled by rotating the camera filter. This results in 100% control of exterior brightness as seen through the window.
