INFOWHEELS

The E-Promotor 100% Electric.

The first electric roadshow vehicle.

The E-Promotor is your compact, easy-to-use roadshow vehicle and is ideal for use within cities. Manoeuvre and promote your product or service in almost any location, particularly useful for those idyllic yet small European streets and plazas. It may be small, but it packs a punch when it comes to fulfilling your promotional needs.

Anytime, anywhere.

The 100% Electric InfoWheels.

Your smart solution in roadshows.

The 100% Electric InfoWheels is your revolutionary, self-drive roadshow solution that allows for touching brand experiences within the environment of your target group. Want to share your sustainability values?

This vehicle is perfect to communicate all your ecological beliefs directly to your clientele. The electric InfoWheels is the ultimate environmentally-friendly ready-to-go roadshow solution for medium-range use.

Economical, ecological, and easy-to-use.

ROADSHOWS**

100% ELECTRIC, 100% OUR AMBITION

100% Electric Roadshows
100% Our ambition

Impress your environment.

Meet our fully electric roadshow solutions.

While our fully electric InfoWheels and E-Promotor mark a big leap into environmentally-friendly roadshow solutions, our EggStreamer is equally as sustainable when paired with a suitable electric car. And all you need is a driver's license B+E. Based on your needs, we translate your wishes into a roadshow solution to strengthen your brand awareness, relevance, and success everywhere. Want to know which small-scale roadshow suits your brand best? Find your ideal roadshow solution here!

Smart thinking.

In control of everything with your self-drive roadshow.

Take charge of your own city-centred roadshow by putting yourself behind the wheel. Our electric roadshow solutions allow you to bring your promotional material to your target group. Their ease of use and small size allows for a quick set-up, ensuring you more time with your target audience. Experience reliable and innovative roadshow solutions that create touching brand experiences that suit your needs while taking a step into a greener future.

Drive yourself

No need to hire a professional driver. You, your team, or anyone with a regular driving license (category B for the E-Promotor and InfoWheels, or category B+E for the EggStreamer) can drive these multifunctional mobile units.

Low cost

Due to their relatively small size and easy set-up, you will decide when and where to set up this easy, low cost, multifunctional mobile units.

Easy set-up

Save set-up time. It takes just five minutes to put up the Roadshow units, giving you and your team more time to interact with your audience.

Self-sufficient environmentally friendly

Make your roadshows environmentally friendly with our electric roadshows. These electric roadshow vehicles are the first ever to hit the market.

Why wait for the effects of the Glasgow Climate Summit?

Companies around the globe announce their ambitions to be climate neutral or CO² neutral in 2030 or even later in 2050. But why wait? Take the first step now, and we can make the difference together!

100% electric, 100% our ambition.

Let's be honest, not all technology is ready for it, and there are still many limitations for electric roadshow solutions. However, EventRent can already provide solutions for short and medium-range roadshows, while our goal is to deliver large-scale electric solutions to the European market by 2025. We are the only roadshow company to make advances to reduce our carbon footprint in all areas. Our buildings are outfitted with nearly 1,500 solar panels, creating 2 megawatts of power on a sunny day. In addition, our fleet of more than 120 of our standard InfoWheels have been equipped with solar panels since 2010. That's 720 solar panels contributing to our environment for over 11 years!

So why wait? Partner now, and we will be ahead of the game. Together, with a step-by-step approach, we will contribute to a more sustainable future.
